

HDPE SOLID PLASTIC SIX TIER LOCKERS

Completely Customizable | Durable | Low Maintenance | Sleek Look

LEED® Certified

Manufactured from environmentally friendly materials that contain up to 75% Post-Consumer-Recycled HDPE Summit's plastic lockers are 100% recyclable.

Hygienic

Non-porous surfaces which make Summit's lockers easy to clean and safe from rust, mold and mildew.

Welded Construction

HDPE locker bodies are constructed from a single sheet of solid plastic using a welding process to bond the tops, bottoms, and doors to the single body unit.

Water Resistant

With through color panels and an orange peel finish, HDPE lockers are great for high moisture areas and will resist both discoloration and deterioration.
