

ZEPHYR 5200 SERIES

Summit lockers with built in day use locks utilize Zephyr model 5254 and 5270 digital locks.

- Flexible programming allowing for shared and permanent placements
- Accessible by keypad, RFID card, fob, or wristband
- Spring latch locking for increased ease of use or dead bolt locking for higher security
- Standard Mifare classic RFID technology with the ability to work with Desfire EV1 and EV2
- Multi-layer encryption for highest levels of security
- Supervisory access and override with control and management cards and codes
- Complies with ADA guidelines for ADA accessibility
- LEDs used for visual in-use indicators
- Locker management system for centralized control on wireless systems
- Offers custom programming features such as time-based operations, audit trail capability, and multi user access to certain high security enclosures
- Humidity resistant making it ideal for virtually all locker environments
